-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bottger et al (US Dept. Agr., Bur. Entomol. Plant Quarantine, 1946, E-710, p. 5), Li (CN 1194782; 10/07/98), and Qin (CN 1032731; 05/10/89). Bottger teaches an insecticidal composition comprising anabasine. Li teaches an insecticidal composition comprising stemonine. Qin teaches an insecticidal composition comprising Toosendanin and pine oil. The references do not teach a single composition comprising anabasine, stemonine, plus toosendanin. However, it would have been obvious to one having ordinary skill in the art to combine the references resulting in a single composition comprising anabasine, stemonine plus toosendanin. One would have been motivated to do this since all individual references teach insecticidal compositions – it is obvious to combine references teaching the utility. Applicant claims a synergistic composition. However, provides no data in the specification to support a synergistic composition.

***Claim Objection***

Claims 2-30,57-60 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the limitations of these claims.
